

Our Pledge to Reach Net Zero by 2035

As a Company with a commitment to continuously improving our environmental performance, we are pleased to announce that in 2021 we pledged to reach Net Zero by 2035 (with Scope 1 and 2* to be achieved by 2025).

The Glasdon Group of Companies aim to demonstrate environmental sustainability and champion social responsibility in every way possible. A passion for the environment and our local and wider communities has inspired us to integrate sustainable and ethical practices into our day-to-day activities, something we are continually assessing and improving.

We have invested considerable resources over the years into understanding our impact on the environment, and we will continue to invest in and improve on our environmental accountability for all aspects of our Business. We have established a Board level project team to map out a clear route of how to get there, as well as dedicated project teams to include employees from all across the Company.

We understand the challenges that lie ahead, and will continue to work alongside our employees, customers, and suppliers to ensure that **Glasdon leads the way in seizing every opportunity to drive down emissions and to hit our goal of reaching Net Zero by 2035.**

"As a market leader in our field, we understand the responsibility we have to improve our environmental and social impact, and our Net Zero goals are a huge factor towards achieving this.

We have work to do to reach Net Zero, but with the right dedication and experience we are confident that we will hit our 2035 target. We welcome the challenge and look forward to sharing our responsible business journey along the way!"

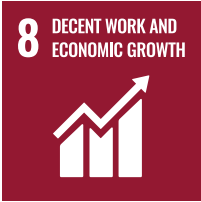

Glasdon Group Founder and Chairman,
Donald J Sidebottom MBE, FCIHT.

Our Alignment with the United Nations Sustainable Development Goals

Our pledge to reach Net Zero by 2035 is an enormous step towards sustainability, but we also understand that we have a role to play in addressing wider global needs including health, social protection, education, job opportunities and environmental protection. This is why we have responded to the United Nations' (UN) call for action by aligning ourselves with the Sustainable Development Goals (SDGs).

While Glasdon may fit into most (if not all) of the 17 UN SDGs, we have identified four key goals in which we know we can have a direct positive impact.

We are currently working on a plan of action to identify how we are already supporting each goal, as well as the steps we can take internally and with our suppliers, distributors, employees and customers to help further this impact.

Our Commitment to Being a Fair and Trusted Business

Being a fair, trusted and well-respected Company is a top priority for all at Glasdon. Our Business was built with family values and loyalty at the heart of everything we do, and we reward a high level of personal commitment and passion. Ethics and integrity are key considerations in all aspects of the Business, with a focus on suppliers, customers, employees, distributors and all other personnel associated with Glasdon.

The welfare of our employees is of the upmost importance to our Company. We have strict safeguarding and ethical policies in place and follow stringent health and safety guidelines in order to ensure our employees are protected wherever possible.

We aim to foster team spirit in all areas of our Business so that each and every employee knows they are a valued and contributing factor towards our Company's development. We work hard to help our employees develop in terms of their job roles, as well as personal development and growth.

The DJ Sidebottom / Glasdon Charitable Programme

We are committed to ensuring that Glasdon follows a sustainable and responsible business approach, with social responsibility at the heart of the Company. We have always been an active member of our local community and are dedicated to giving back in any way we can.

The DJ Sidebottom /
**Glasdon Charitable
Programme**

Our recent development of the DJ Sidebottom / Glasdon Charitable Programme has allowed us to increase our charitable efforts through donations, fundraising, sponsorships, product gifting and more. We even announced our first Glasdon Employee Charity of the Year in December 2021, awarding our worthy winners CRY (Cardiac Risk in the Young) with a generous £10,000 donation.

We are always looking for charities, organisations and community groups to support, and invite those who are looking to receive funding from the DJ Sidebottom / Glasdon Charitable Programme to apply for a grant directly from us via our new website,
www.djsglasdoncharitableprogramme.org/grants

All grants supplied by the DJ Sidebottom / Glasdon Charitable Programme are funded by Glasdon Group Limited, with the full support of our Chairman, Donald J Sidebottom MBE, FCIHT and our Board of Directors.

Next Steps on Our Responsible Business Journey

Our journey to Net Zero is one that cannot be understated. We have set ourselves a number of short-term goals to achieve throughout the course of this year, all of which we believe will aid us in achieving our Net Zero target by 2035.

In 2023, Glasdon Group Limited will:

- Sign up to the Science Based Targets initiative (SBTi)
- Engage with our suppliers on their Net Zero and SDG plans
- Install more solar panels on our Company buildings and consider wind generation and battery storage
- Improve our Electric Vehicle (EV) Charging infrastructure and expand to all Glasdon sites
- Continue the ongoing replacement of Company vehicles with electric and hybrid models

We will be reporting on our progress as we go, so make sure to check back on our website or **subscribe to our newsletter** for regular updates on both our Net Zero goals and our commitment to the SDGs.

We'll plant a tree for every live chat, quote request and newsletter subscriber we receive, so make sure to get in touch via our website today!

You can also keep track of our tree-planting initiatives via our virtual forest at <https://ecologi.com/glasdonuk>

*The Green House Gas Protocol Corporate Standard classifies a company's GHG emissions into three 'scopes'. Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy.
